- JAVASCRIPT
- TYPESCRIPT
- REACT.JS
- NODE.JS
- EXPRESS.JS
- MONGODB
- MONGOOSE
- SQL / SEQUELIZE
- TAILWINDCSS
- SASS

PROJECTS

- **Vinyl Vortex Records**   *https://github.com/BZAgustin/vinyl-vortex-records*

Fullstack web application for a fictitious record store built with NodeJS, Express and Bootstrap as part of my back-end learning path. Browse, add, remove or organize a collection of albums, artists and genres.

- **Online CV Creator**   *https://github.com/BZAgustin/cv-application*

Online resume creation/customization website built with ReactJS. One of my first ventures into front-end frameworks, built with the goal of providing peers with a straightforward tool to work on a resume.

- **SkyCast Weather**   *https://github.com/BZAgustin/weather-app*

Simple website to check weather conditions around the world. Made with the goal of solidifying my knowledge in asynchronous programming and API usage. Consumes the WeatherAPI's public API to fetch region-specific weather condition data.

EDUCATION

- ## Systems Engineering
  Universidad Tecnológica Nacional *- March 2019 to May 2020*

- ## Public English Translation
  Universidad Nacional de Córdoba *- March 2014 to December 2017*
